This page has been left blank intentionally

On behalf of the Directors, I am pleased to present the annual report for the Company for the year ended 30th June 2017.

The year under review is highlighted by targeted sales revenue growth in Butchery and Food Service supplies as per the strategic plan, investment in a new Food Service sales team, additional resource within the purchasing area and one off legal costs.

Operational changes continued to be implemented across all business units designed to improve operational efficiency and customer service.

COMMENTARY ON FINANCIAL RESULTS

Stable sales in our core butchery market and a strategic focus on the Food Service and Bakery sectors ensured continued sales growth. Tough trading conditions placed downward pressure on margins across a number of product categories.

The company achieved a trading operating profit before tax of \$561,000. During the year, abnormal legal costs reduced the net profit before tax to \$313,000 (see Note 3). An agreement is in place for the settlement of this legal dispute.

The operating profit was achieved on improved sales revenue of \$20,104,000, a growth of \$985,000, representing sales growth of 5.1% over the previous year.

Normal operating costs increased during the year primarily as a result of the introduction of a new Food Service sales team as well as additional resources allocated to purchasing and blending activities. The investment in these resources added an additional \$215,000 to operational costs. The new sales team is beginning to make a significant impact on sales revenue generated from new customers.

New Food Service sales were supported by an expansion of freezer capacity as well as an upgrade of the truck fleet to accommodate the distribution of ambient, frozen and chilled product.

The company's financial position remains strong with no debt and cash reserves of \$1.977M.

Total shareholder equity is \$13.1M and a net asset backing of \$1.82.

DIVIDENDS

The Directors have resolved to declare a dividend of \$0.03 per share fully franked.

OUTLOOK

Future earnings will be underpinned by projected sales revenue growth as our traditional butchery sales team deliver on targeted sales opportunities and the new Food Service team continues to gain new business.

Market share growth in our core butchery supplies business and forecast gains in food service, bakery, and packaging are expected to continue to deliver improved returns on assets and improved shareholder value.

Planned improvements in inventory and warehouse management are also expected to support improvements in inventory management and customer service; two areas, which are important deliverables to support profit growth projections.

Gross profit is forecast to continue to grow on projected sales revenue.

Gross margin is expected to remain under pressure should softer trading conditions and supplier cost increases continue to put pressure on wholesale pricing.

The Company is in a sound financial position with quality assets, strong cash flow from operations and cash reserves to fund improvements in asset infrastructure through a planned expansion of our cold storage facility and a possible acquisition, both of which are expected to accelerate revenue and profit growth as well as improve the net asset backing per share.

BOARD AND SENIOR MANAGEMENT

Mr James De Leo is retiring pursuant to the Company's constitution at the forthcoming Annual General Meeting. James has advised that while he remains strongly supportive of the Company's current business plans, because of his own business commitments he is not offering himself for re-election. I would like to thank James for the significant contribution he has made to the Company over the term of his appointment.

The following new appointments were made during the year:

- Mr. Daniele Ciampini was appointed to the Board on 1 May 2017 for a 3-year period. Daniele has a Diploma in Dental Technology with over 20 years' experience in Practice Management. Mr Daniele Ciampini is the current Chairman of Mondo Doro Smallgoods and brings to the Board his experience in business management within the smallgoods industry and in private practice.
- Mr. Derek Smith was appointed to the Board on 19 December 2016. Derek is the current Chief Executive of MBL and brings to the Board over 34 years' experience in business management covering both public and private organisations primarily within the food processing and wholesale distribution sectors.
- Mr. Colin Mitchell was appointed as Company Secretary on 19 December 2016. Colin is tertiary and CPA qualified with experience in financial control and reporting, tax and business planning. Colin has over 30 years' practical accounting experience across several industry sectors.

Your Directors are confident and committed in delivering continuous improvement in profit performance and expect to further grow shareholder value.

ALLAN LEWIS

Chairman of Directors

Dated this 25th day of October 2017

MBL Trading Limited has business operations covering the following areas

- a) Butchery, bakery, packaging and food service sales, distribution and warehouse services
- b) Blending and contract packing of premixes and other food ingredients
- c) Food machinery sales
- d) Mechanical services and blade sharpening
- e) Retail point of sales systems

MBL Trading Ltd remains Western Australia's leading diversified provider of products and services to the butchery sector with an increasing footprint in the bakery, packaging, and food service sectors. The company continues to focus on improving customer service in all sectors as the business expands. Sales revenue and gross profit is being driven by product range extension, customer and market development and new initiatives introduced to support improved business performance and provide a strong foundation for future growth.

SALES AND PURCHASING

New members of the sales team charged with servicing our traditional core butchery supply business have settled in their roles and unlocking new business opportunities as well as servicing the day-to-day requirements of our customers.

During the year, a new Food Service sales team comprising three (3) Account Managers was established. This team is charged with driving new sales revenue and profit growth in the mainstream food service sector and as a result takes the business into new markets and customers and supported through an expanded product range. The new sales team is also contributing to sales growth in the bakery and packaging sectors.

Changes within the Mechanical Services and Retail Solutions teams reduced costs and increased billable hours. Both areas are now operating at a higher level of efficiency and cost recovery.

The push into mainstream food service required the appointment of an additional purchasing resource to support the introduction of an expanded product range and support the product replenishment program.

FINANCE AND ADMINISTRATION

Tighter financial controls were introduced throughout the year leading to improved collections in a higher risk market. A stable IT and management reporting platform provided accurate reporting to support management decision making and operations.

The profit delivery program set up to identify cost savings requires continual focus to ensure increased costs are offset by efficiency savings.

WAREHOUSE AND LOGISTICS

Warehouse and logistics operations went through a significant change program designed to allow the business to service existing and new customers in a way that meets our customer's delivery expectations. The new system presented some challenges. The structure and process continues to be refined to support our customers' expectations.

Inventory management continues to be an area where improvement to processes and procedures is required to reduce the number of stock adjustments in inventory and improve our pick accuracy as the product range expands and in doing so improve customer service levels.

OCCUPATIONAL HEALTH & SAFETY

The workplace health and safety program continued to support a safe workplace environment, which produced a zero loss time injury achievement for the second consecutive year. The provision of a safe workplace and a high level of employee safety awareness and engagement remains a daily objective.

All statutory audits were successfully completed and changes to all MBL product labelling have commenced to meet new food labelling legislation being introduced in 2018.

STAFF DEVELOPMENT AND CULTURE

Recruitment within the sales and warehousing areas strengthened the team. A performance appraisal system was successfully introduced with all employees being performance reviewed and key objectives agreed.

MBL FOOD SERVICES MISSION STATEMENT

To be the leading supplier to the butchery, bakery and selected food service sectors. By meeting our customers' needs and supported by operational excellence and service, we will provide growth opportunities for customers, shareholders, and staff.

MBL FOOD SERVICES VISION STATEMENT

To be WA's leading Food Service supplier, most admired for its people, partnerships, and performance.

DEREK C SMITH
Chief Executive Officer

D. S. Smel

Dated this 25th day of October 2017

Your directors present their report on the company for the financial year ended 30 June 2017.

DIRECTORS

D Ciampini

A W Lewis (Chair) M P Collett - ceased 7 November 2016

J G Percy R G Moonen - retired 22 November 2016

J P De Leo D C Smith - appointed 19 December 2016

Directors have been in office since the start of the financial year to the date of this report unless otherwise stated.

PRINCIPAL ACTIVITIES

During the year, the principal continuing activities of the Company consisted of:

- (a) Wholesale and Retail sales of Butchery, Food Service and, Bakery Ingredients and requisites
- (b) Food Machinery Sales and Service
- (c) Scales, Cash Registers and POS Sales and Service
- (d) Sharpening and Grinding Sales and Service

- appointed 1 May 2017

No significant change in the nature of these activities occurred during the year.

REVIEW OF OPERATIONS

MBL Trading Limited has business operations covering the following areas:

- a) Food service, distribution, and warehouse services
- b) Contract blending and packing of premixes and other food ingredients
- c) New machinery sales and service
- d) Blade sharpening and other mechanical services
- e) Retail sales systems solutions

During the year, all business divisions operated satisfactorily with the exception of Mechanical Services due to a reduction in available skilled technicians. Together these divisions provide the basis for the company's strong focus on customer service and value. MBL Trading Ltd remains Western Australia's leading diversified provider of services to the butchery, bakery, and food service industry. Going forward, the company will continue to focus on improving customer service. Increasing sales revenue and gross profit will be supported by product range development, purchasing management and a profit delivery program focused on improved efficiencies and cost control.

SIGNIFICANT CHANGES IN THE STATE OF AFFAIRS

No significant changes in the company's state of affairs occurred during the financial year.

EVENTS SUBSEQUENT TO THE END OF THE REPORTING PERIOD

No matters or circumstances have arisen since the end of the financial year, which significantly affect or could significantly affect the operations of the company, the results of those operations or the state of affairs of the company in future financial years.

LIKELY DEVELOPMENTS AND EXPECTED RESULTS OF OPERATIONS

The company will continue to pursue increased profitability and market share of its major business sectors during the succeeding financial year, whilst evaluating possibilities to expand or add to these business sectors.

DIVIDENDS

Since the end of the financial year, the Directors have resolved to pay a fully franked Ordinary Dividend for the year ended 30 June 2017 of \$0.03 cents (2016 – \$0.05 cents) per fully paid share to be paid in November 2017.

	2017	2016
	\$'000	\$'000
Final Ordinary Dividend Payable	215	359

A fully franked dividend of \$358,957 was paid during the year as recommended in last year's report.

ENVIRONMENTAL REGULATION

The company's operations are not regulated by any significant environmental regulation under a law of the Commonwealth or of a state or territory.

OPTIONS

No options over issued shares or interests in the company were granted during or since the end of the financial year and there were no options outstanding at the date of this report.

No shares were issued during or since the end of the year as a result of the exercise of an option over unissued shares or interests.

INDEMNIFICATION OF OFFICERS

The company has, during the financial year, in respect of any person who is or has been an officer of the company paid a premium of \$4,004 in respect of Directors' and Officers' Liability Insurance which indemnifies the Directors and Officers of the company for any claims made against the Directors and Officers of the company, subject to the conditions contained in the insurance policy.

No indemnities have been given or insurance premiums paid, during or since the end of the financial year, for the auditors of the company

PROCEEDINGS ON BEHALF OF COMPANY

Litigation against the Company during the year has been settled. A confidential settlement and details are prohibited from disclosure.

INFORMATION ON DIRECTORS

Allan W Lewis, Chairman - Non-Executive

Independent non-executive director for 26 years

Experience in wholesale/retail butchering and business management

Michael P Collett, Non-Executive Director

Independent non-executive director for 20 years

Experience in wholesale/retail butchering and business management

John G Percy, Non-Executive Director

Independent non-executive director for 17 years

Experience in wholesale/retail butchering and business management

Rodney G Moonen, Non-Executive Director

Independent non-executive director

Appointed to the Board on 14 January 2014

Qualifications and Experience: Bachelor of Business Studies (Curtin University)

Over 40 Years' experience in management and finance.

Directorships held in listed entities: FFI Holdings Limited (1990 to present)

Appointed to the Board on 19 December 2016

Qualifications and Experience: Bachelor Degree in Business and Administration (University of Strathclyde – United Kingdom).

Over 34 years' experience in business management covering both public and private organisations primarily within the food processing and wholesale distribution sectors.

Daniele Ciampini, Non-Executive Director

Independent non-executive director.

Appointed to the Board on 1 May 2017

Qualifications and Experience: Diploma in Dental Technology with over 20 years' experience in Practice Management. Current Chairman of Mondo Doro Smallgoods. Experienced in Business Management.

Directors' Meetings

During the financial year, 13 meetings of directors (including committees of directors) were held. Attendances by each director during the year were as follows:

Directors	Board	Meeting
Directors	Α	В
A W Lewis	13	12
M P Collett	13	4
J G Percy	13	11
R G Moonen	13	4
J P De Leo	13	11
D C Smith	8	8
D Ciampini	3	3

- A Number of meetings held during the time the director held office during the year.
- B Number of meetings attended

Mr J De Leo retires by rotation; he is not offering himself for re-election.

DIRECTORS' INTERESTS

The relevant interests of each director in the shares of the Company are:

	Ordinary Shares
A W Lewis	6,588
M P Collett	0
J G Percy	116,948
R G Moonen	71,618
J P De Leo	93,166
D C Smith	50
D Ciampini	1409

No director has received or become entitled to receive, during or since the end of the financial period, a benefit because of a contract made by the company, or a related company with a director, a firm of which a director is a member or an entity in which a director has substantial financial interest, other than the benefits as disclosed in the notes to and forming part of the accounts.

COMPANY SECRETARY

The following person held the position of company secretary at the end of the financial year: C Mitchell.

AUDITOR'S INDEPENDENCE DECLARATION

A copy of the auditor's independence declaration as required under s 307C of the *Corporations Act 2001* is set out on page 8.

No officer of the company is or has been a partner/director of any auditor of the company.

ASIC CORPORATIONS (ROUNDING IN FINANCIAL/DIRECTORS' REPORTS) INSTRUMENT 2016/191

The company is an entity to which ASIC Corporations (Rounding in Financial/Directors' Reports) Instrument 2016/191 applies and, accordingly, amounts in the financial statements and directors' report have been rounded to the nearest thousand dollars where stated.

This director's report is signed in accordance with a resolution of the Board of Directors:

A W LEWIS

Dated this 25th day of October 2017

J G PERCY

AUDITOR'S INDEPENDENCE DECLARATION UNDER S 307C OF THE CORPORATIONS ACT 2001 TO THE DIRECTORS OF MBL TRADING LIMITED

I declare that, to the best of my knowledge and belief, during the year ended 30 June 2017 there have been no contraventions of:

- i. the auditor independence requirements as set out in the Corporations Act 2001 in relation to the audit; and
- ii. any applicable code of professional conduct in relation to the audit.

NOTES TO THE FINANCIAL STATEMENTS

For the year ended 30 June 2017

The financial statements cover MBL Trading Limited as an individual entity. MBL Trading Limited is a company limited by shares, incorporated and domiciled in Australia.

The financial statements were authorised for issue on 25th October 2017 by the directors of the company.

NOTE 1: SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Basis of Preparation

These general-purpose financial statements have been prepared in accordance with the *Corporations Act 2001* and Australian Accounting Standards and Interpretations of the Australian Accounting Standards Board. The company is a for-profit entity for financial reporting purposes under Australian Accounting Standards.

Australian Accounting Standards set out accounting policies that the Australian Accounting Standards Board has concluded would result in financial statements containing relevant and reliable information about transactions, events and conditions. Compliance with Australian Accounting Standards ensures that the financial statements and notes also comply with International Financial Reporting Standards. Material accounting policies adopted in the preparation of the financial statements are presented below and have been consistently applied unless stated otherwise.

The financial statements, except for cash flow information, have been prepared on an accrual basis and are based on historical costs, modified, where applicable, by the measurement at fair value of selected non-current assets, financial assets and financial liabilities. The amounts presented in the financial statements have been rounded to the nearest dollar unless stated otherwise.

a. Income Tax

The income tax expense (income) for the year comprises current income tax expense (income) and deferred tax expense (income).

Current income tax expense charged to profit or loss is the tax payable on taxable income for the current period. Current tax liabilities (assets) are therefore measured at the amounts expected to be paid to (recovered from) the relevant taxation authority using tax rates (and tax laws) that have been enacted or substantively enacted by the end of the reporting period.

Deferred income tax expense reflects movements in deferred tax asset and deferred tax liability balances during the year as well as unused tax losses.

Current and deferred income tax expense (income) is charged or credited outside profit or loss when the tax relates to items that are recognised outside profit or loss.

Deferred tax assets and liabilities are calculated at the tax rates that are expected to apply to the period when the asset is realised or the liability is settled and their measurement also reflects the manner in which management expects to recover or settle the carrying amount of the related asset or liability. With respect to non-depreciable items of property, plant and equipment measured at fair value and items of investment property measured at fair value, the related deferred tax liability or deferred tax asset is measured on the basis that the carrying amount of the asset will be recovered entirely through sale. When an investment property that is depreciable is held by the entity in a business model whose objective is to consume substantially all of the economic benefits embodied in the property through use over time (rather than through sale), the related deferred tax liability or deferred tax asset is measured on the basis that the carrying amount of such property will be recovered entirely through use.

Deferred tax assets relating to temporary differences and unused tax losses are recognised only to the extent that it is probable that future taxable profit will be available against which the benefits of the deferred tax asset can be utilised.

Where temporary differences exist in relation to investments in subsidiaries, branches, associates and joint ventures, deferred tax assets and liabilities are not recognised where the timing of the reversal of the temporary difference can be controlled and it is not probable that the reversal will occur in the foreseeable future.

Current tax assets and liabilities are offset where a legally enforceable right of set-off exists and it is intended that net settlement or simultaneous realisation and settlement of the respective asset and liability will occur. Deferred tax assets and liabilities are offset where: (i) a legally enforceable right of set-off exists; and (ii) the deferred tax assets and liabilities relate to income taxes levied by the same taxation authority on either the same taxable entity or different taxable entities, where it is intended that net settlement or simultaneous realisation and settlement of the respective asset and liability will occur in future periods in which significant amounts of deferred tax assets or liabilities are expected to be recovered or settled.

NOTE 1: SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

b. Fair Value of Assets and Liabilities

The company measures some of its assets and liabilities at fair value on either a recurring or non-recurring basis, depending on the requirements of the applicable Accounting Standard.

Fair value is the price the company would receive to sell an asset or would have to pay to transfer a liability in an orderly (i.e. unforced) transaction between independent, knowledgeable and willing market participants at the measurement date.

As fair value is a market-based measure, the closest equivalent observable market pricing information is used to determine fair value. Adjustments to market values may be made having regard to the characteristics of the specific asset or liability. The fair values of assets and liabilities that are not traded in an active market are determined using one or more valuation techniques. These valuation techniques maximise, to the extent possible, the use of observable market data.

To the extent possible, market information is extracted from either the principal market for the asset or liability (ie the market with the greatest volume and level of activity for the asset or liability) or, in the absence of such a market, the most advantageous market available to the entity at the end of the reporting period (ie the market that maximises the receipts from the sale of the asset or minimises the payments made to transfer the liability, after taking into account transaction costs and transport costs).

For non-financial assets, the fair value measurement also takes into account a market participant's ability to use the asset in its highest and best use or to sell it to another market participant that would use the asset in its highest and best use.

The fair value of liabilities and the entity's own equity instruments (excluding those related to share-based payment arrangements) may be valued, where there is no observable market price in relation to the transfer of such financial instrument, by reference to observable market information where such instruments are held as assets. Where this information is not available, other valuation techniques are adopted and, where significant, are detailed in the respective note to the financial statements.

c. Inventories

Inventories are measured at the lower of cost and net realisable value. The cost of manufactured products includes direct materials, direct labour and an appropriate portion of variable and fixed overheads. Overheads are applied on the basis of normal operating capacity. Costs are assigned on the basis of weighted average costs.

d. Property, Plant and Equipment

Each class of property, plant and equipment is carried at cost or fair value as indicated less, where applicable, any accumulated depreciation and impairment losses.

Property

Freehold land and buildings are carried at their fair value (being the amount for which an asset could be exchanged between knowledgeable willing parties in an arm's length transaction), based on periodic, but at least triennial, valuations by external independent valuers, less accumulated depreciation for buildings.

Increases in the carrying amount arising on revaluation of land and buildings are credited to a revaluation surplus in shareholders' equity. Decreases that offset previous increases of the same asset are recognised against fair value reserves directly in equity; all other decreases are recognised in profit or loss.

Any accumulated depreciation at the date of revaluation is eliminated against the gross carrying amount of the asset and the net amount is restated to the revalued amount of the asset.

Plant and equipment

Plant and equipment are measured on the cost basis and are therefore carried at cost less accumulated depreciation and any accumulated impairment. In the event the carrying amount of plant and equipment is greater than the estimated recoverable amount, the carrying amount is written down immediately to the estimated recoverable amount. A formal assessment of recoverable amount is made when impairment indicators are present (refer to Note 1(g) for details of impairment).

Subsequent costs are included in the asset's carrying amount or recognised as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the entity and the cost of the item can be measured reliably. All other repairs and maintenance are charged to the statement of comprehensive income during the financial period in which they are incurred.

NOTE 1: SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

d. Property, Plant and Equipment (continued)

Depreciation

The depreciable amount of all fixed assets, including building and capitalised lease assets but excluding freehold land, is depreciated on a straight-line basis over the asset's useful life to the entity commencing from the time the asset is held ready for use. Leasehold improvements are depreciated over the shorter of either the unexpired period of the lease or the estimated useful lives of the improvements.

The depreciation rates used for each class of depreciable assets are:

Class of Fixed AssetDepreciation RateBuildings2.5 - 4%Plant and equipment3 - 40%Motor Vehicles22.5 - 27%

The assets' residual values and useful lives are reviewed, and adjusted if appropriate, at the end of each reporting period.

An asset's carrying amount is written down immediately to its recoverable amount if the asset's carrying amount is greater than its estimated recoverable amount.

Gains and losses on disposals are determined by comparing proceeds with the carrying amount. These gains or losses are included in the statement of comprehensive income. When revalued assets are sold, amounts included in the revaluation surplus relating to that asset are transferred to retained earnings.

e. Leases

Leases of fixed assets, where substantially all the risks and benefits incidental to the ownership of the asset (but not the legal ownership) are transferred to the company are classified as finance leases.

Finance leases are capitalised by recognising an asset and a liability at the lower of the amounts equal to the fair value of the leased property or the present value of the minimum lease payments, including any guaranteed residual values. Lease payments are allocated between the reduction of the lease liability and the lease interest expense for the period.

Leased assets are depreciated on a straight-line basis over their estimated useful lives where it is likely that the company will obtain ownership of the asset or over the term of the lease.

Lease payments for operating leases, where substantially all the risks and benefits remain with the lessor, are recognised as expenses in the periods in which they are incurred.

Lease incentives under operating leases are recognised as a liability and amortised on a straight-line basis over the life of the lease term.

f. Financial Instruments

Initial recognition and measurement

Financial assets and financial liabilities are recognised when the entity becomes a party to the contractual provisions to the instrument. For financial assets, this is equivalent to the date that the company commits itself to either purchase or sell the asset (i.e. trade date accounting is adopted).

Financial instruments are initially measured at fair value plus transactions costs except where the instrument is classified "at fair value through profit or loss," in which case transaction costs are expensed to profit or loss immediately.

Classification and subsequent measurement

Financial instruments are subsequently measured at fair value, amortised cost using the effective interest method or cost. Where available, quoted prices in an active market are used to determine fair value. In other circumstances, valuation techniques are adopted.

Amortised cost is calculated as the amount at which the financial asset or financial liability is measured at initial recognition less principal repayments and any reduction for impairment, and adjusted for any cumulative amortisation of the difference between that initial amount and the maturity amount calculated using the effective interest method.

NOTE 1: SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

f. Financial Instruments (continued)

The effective interest method is used to allocate interest income or interest expense over the relevant period and is equivalent to the rate that exactly discounts estimated future cash payments or receipts (including fees, transaction costs and other premiums or discounts) through the expected life (or when this cannot be reliably predicted, the contractual term) of the financial instrument to the net carrying amount of the financial asset or financial liability. Revisions to expected future net cash flows will necessitate an adjustment to the carrying amount with a consequential recognition of an income or expense item in profit or loss.

The company does not designate any interests in subsidiaries, associates or joint venture entities as being subject to the requirements of Accounting Standards specifically applicable to financial instruments.

(i) Financial assets at fair value through profit or loss

Financial assets are classified at "fair value through profit or loss" when they are held for trading for the purpose of short-term profit taking, derivatives not held for hedging purposes, or when they are designated as such to avoid an accounting mismatch or to enable performance evaluation where a company of financial assets is managed by key management personnel on a fair value basis in accordance with a documented risk management or investment strategy. Such assets are subsequently measured at fair value with changes in carrying amount being included in profit or loss.

(ii) Loans and receivables

Loans and receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market and are subsequently measured at amortised cost. Gains or losses are recognised in profit or loss through the amortisation process and when the financial asset is derecognised.

(iii) Held-to-maturity investments

Held-to-maturity investments are non-derivative financial assets that have fixed maturities and fixed or determinable payments, and it is the company's intention to hold these investments to maturity. They are subsequently measured at amortised cost. Gains or losses are recognised in profit or loss through the amortisation process and when the financial asset is derecognised.

(iv) Available-for-sale investments

Available-for-sale investments are non-derivative financial assets that are either not capable of being classified into other categories of financial assets due to their nature or they are designated as such by management. They comprise investments in the equity of other entities where there is neither a fixed maturity nor fixed or determinable payments.

They are subsequently measured at fair value with any remeasurements other than impairment losses and foreign exchange gains and losses recognised in other comprehensive income. When the financial asset is derecognised, the cumulative gain or loss pertaining to that asset previously recognised in other comprehensive income is reclassified into profit or loss.

Available-for-sale financial assets are classified as non-current assets when they are expected to be sold within 12 months after the end of the reporting period. All other available-for-sale financial assets are classified as current assets.

(v) Financial liabilities

Non-derivative financial liabilities other than financial guarantees are subsequently measured at amortised cost. Gains or losses are recognised in profit or loss through the amortisation process and when the financial liability is derecognised.

Impairment

At the end of each reporting period, the company assesses whether there is objective evidence that a financial asset has been impaired. A financial asset or a company of financial assets is deemed to be impaired if, and only if, there is objective evidence of impairment as a result of one or more events (a "loss event") having occurred, which has an impact on the estimated future cash flows of the financial asset(s).

NOTE 1: SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

f. Financial Instruments (continued)

In the case of available-for-sale financial assets, a significant or prolonged decline in the market value of the instrument is considered to constitute a loss event. Impairment losses are recognised in profit or loss immediately. Also, any cumulative decline in fair value previously recognised in other comprehensive income is reclassified to profit or loss at this point.

In the case of financial assets carried at amortised cost, loss events may include: indications that the debtors or a company of debtors are experiencing significant financial difficulty, default or delinquency in interest or principal payments; indications that they will enter bankruptcy or other financial reorganisation; and changes in arrears or economic conditions that correlate with defaults.

For financial assets carried at amortised cost (including loans and receivables), a separate allowance account is used to reduce the carrying amount of financial assets impaired by credit losses. After having taken all possible measures of recovery, if management establishes that the carrying amount cannot be recovered by any means, at that point the written-off amounts are charged to the allowance account or the carrying amount of impaired financial assets is reduced directly if no impairment amount was previously recognised in the allowance account.

When the terms of financial assets that would otherwise have been past due or impaired have been renegotiated, the company recognises the impairment for such financial assets by taking into account the original terms as if the terms have not been renegotiated so that the loss events that have occurred are duly considered.

Financial guarantees

Where material, financial guarantees issued, which requires the issuer to make specified payments to reimburse the holder for a loss it incurs because a specified debtor fails to make payment when due are recognised as a financial liability at fair value on initial recognition.

The fair value of financial guarantee contracts has been assessed using a probability-weighted discounted cash flow approach. The probability has been based on:

- the likelihood of the guaranteed party defaulting during the next reporting period;
- the proportion of the exposure that is not expected to be recovered due to the guaranteed party defaulting;
 and
- the maximum loss exposure if the guaranteed party were to default.

Financial guarantees are is subsequently measured at the higher of the best estimate of the obligation in accordance with AASB 137: Provisions, Contingent Liabilities and Contingent Assets, and the amount initially recognised less, when appropriate, cumulative amortisation in accordance with AASB 118: Revenue. Where the entity gives guarantees in exchange for a fee, revenue is recognised under AASB 118.

Derecognition

Financial assets are derecognised when the contractual rights to receipt of cash flows expires or the asset is transferred to another party whereby the entity is no longer has any significant continuing involvement in the risks and benefits associated with the asset. Financial liabilities are derecognised when the related obligations are discharged, cancelled or have expired. The difference between the carrying amount of the financial liability extinguished or transferred to another party and the fair value of consideration paid, including the transfer of noncash assets or liabilities assumed, is recognised in profit or loss.

g. Impairment of Non-Financial Assets

At the end of each reporting period, the company assesses whether there is any indication that an asset may be impaired. The assessment will include considering external sources of information and internal sources of information, including dividends received from subsidiaries, associates or jointly controlled entities deemed to be out of pre-acquisition profits. If such an indication exists, an impairment test is carried out on the asset by comparing the recoverable amount of the asset, being the higher of the asset's fair value less costs to sell and value in use, to the asset's carrying amount. Any excess of the asset's carrying amount over its recoverable amount is recognised immediately in profit or loss, unless the asset is carried at a revalued amount in accordance with another Standard (e.g. in accordance with the revaluation model in AASB 116). Any impairment loss of a revalued asset is treated as a revaluation decrease in accordance with that other Standard.

Where it is not possible to estimate the recoverable amount of an individual asset, the company estimates the recoverable amount of the cash-generating unit to which the asset belongs.

Impairment testing is performed annually for goodwill and intangible assets with indefinite lives.

NOTES TO THE FINANCIAL STATEMENTS

For the year ended 30 June 2017

NOTE 1: SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

h. Intangible Assets

Goodwill

Goodwill is carried at cost less accumulated impairment losses. Goodwill is calculated as the excess of the sum of:

- (i) the consideration transferred;
- (ii) any non-controlling interest; and
- (iii) the acquisition date fair value of any previously held equity interest;

over the acquisition date fair value of net identifiable assets acquired.

The acquisition date fair value of the consideration transferred for a business combination plus the acquisition date fair value of any previously held equity interest shall form the cost of the investment in the separate financial statements.

Fair value uplifts in the value of pre-existing equity holdings are taken to the statement of comprehensive income. Where changes in the value of such equity holdings had previously been recognised in other comprehensive income, such amounts are recycled to profit or loss.

The amount of goodwill recognised on acquisition of each subsidiary in which the company holds less than a 100% interest will depend on the method adopted in measuring the non-controlling interest. The company can elect in most circumstances to measure the non-controlling interest in the acquiree either at fair value (full goodwill method) or at the non-controlling interest's proportionate share of the subsidiary's identifiable net assets (proportionate interest method). In such circumstances, the company determines which method to adopt for each acquisition and this is stated in the respective notes to these financial statements disclosing the business combination.

Under the full goodwill method, the fair value of the non-controlling interest is determined using valuation techniques which make the maximum use of market information where available. Under this method, goodwill attributable to the non-controlling interests is recognised in the company financial statements.

Research and development

Expenditure during the research phase of a project is recognised as an expense when incurred. Development costs are capitalised only when technical feasibility studies identify that the project will deliver future economic benefits and these benefits can be measured reliably.

Development costs have a finite life and are amortised on a systematic basis matched to the future economic benefits over the useful life of the project.

i. Foreign Currency Transactions and Balances

Functional and presentation currency

The functional currency of the company is measured using the currency of the primary economic environment in which that entity operates. The financial statements are presented in Australian dollars which is the parent entity's functional and presentation currency.

Transactions and balances

Foreign currency transactions are translated into functional currency using the exchange rates prevailing at the date of the transaction. Foreign currency monetary items are translated at the year-end exchange rate. Non-monetary items measured at historical cost continue to be carried at the exchange rate at the date of the transaction. Non-monetary items measured at fair value are reported at the exchange rate at the date when fair values were determined.

Exchange differences arising on the translation of monetary items are recognised in the statement of comprehensive income, except where deferred in equity as a qualifying cash flow or net investment hedge.

Exchange differences arising on the translation of non-monetary items are recognised directly in equity to the extent that the gain or loss is directly recognised in equity, otherwise the exchange difference is recognised in the statement of comprehensive income.

NOTE 1: SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

j. Employee Benefits

Short-term employee benefits

Provision is made for the company's obligation for short-term employee benefits. Short-term employee benefits are benefits (other than termination benefits) that are expected to be settled wholly before 12 months after the end of the annual reporting period in which the employees render the related service, including wages, salaries and sick leave. Short-term employee benefits are measured at the (undiscounted) amounts expected to be paid when the obligation is settled.

The company's obligations for short-term employee benefits such as wages, salaries and sick leave are recognised as part of current trade and other payables in the statement of financial position. The company's obligations for employees' annual leave and long service leave entitlements are recognised as provisions in the statement of financial position.

Other long-term employee benefits

Provision is made for employees' long service leave and annual leave entitlements not expected to be settled wholly within 12 months after the end of the annual reporting period in which the employees render the related service. Other long-term employee benefits are measured at the present value of the expected future payments to be made to employees. Expected future payments incorporate anticipated future wage and salary levels, durations of service and employee departures and are discounted at rates determined by reference to market yields at the end of the reporting period on government bonds that have maturity dates that approximate the terms of the obligations. Upon the remeasurement of obligations due to changes in assumptions for other long-term employee benefits, the net change in the obligation is recognised in profit or loss as part of employee benefits expense in the periods in which the changes occur.

The company's obligations for long-term employee benefits are presented as non-current provisions in its statement of financial position, except where the company does not have an unconditional right to defer settlement for at least 12 months after the end of the reporting period, in which case the obligations are presented as current provisions.

k. Provisions

Provisions are recognised when the company has a legal or constructive obligation, as a result of past events, for which it is probable that an outflow of economic benefits will result and that outflow can be reliably measured. Provisions are measured at the best estimate of the amounts required to settle the obligation at the end of the reporting period.

I. Cash and Cash Equivalents

Cash and cash equivalents include cash on hand, deposits held at call with banks, other short-term highly liquid investments with original maturities of three months or less, and bank overdrafts. Bank overdrafts are shown within borrowings in current liabilities on the statement of financial position.

m. Revenue and Other Income

Revenue is measured at the fair value of the consideration received or receivable after taking into account any trade discounts and volume rebates allowed. Any consideration deferred is treated as the provision of finance and is discounted at a rate of interest that is generally accepted in the market for similar arrangements. The difference between the amount initially recognised and the amount ultimately received is interest revenue.

Revenue from the sale of goods is recognised at the point of delivery as this corresponds to the transfer of significant risks and rewards of ownership of the goods and the cessation of all involvement in those goods.

Interest revenue is recognised using the effective interest method, which, for floating rate financial assets is the rate inherent in the instrument. All dividends received shall be recognised as revenue when the right to receive the dividend has been established.

Revenue recognition relating to the provision of services is determined with reference to the stage of completion of the transaction at the end of the reporting period and where outcome of the contract can be estimated reliably. Stage of completion is determined with reference to the services performed to date as a percentage of total anticipated services to be performed. Where the outcome cannot be estimated reliably, revenue is recognised only to the extent that related expenditure is recoverable.

Investment property revenue is recognised on a straight-line basis over the period of the lease term so as to reflect a constant periodic rate of return on the net investment.

Dividend revenue is recognised when the right to receive a dividend has been established

All revenue is stated net of the amount of goods and services tax (GST).

NOTE 1: SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

n. Trade and Other Receivables

Trade and other receivables include amounts due from customers for goods sold and services performed in the ordinary course of business. Receivables expected to be collected within 12 months of the end of the reporting period are classified as current assets. All other receivables are classified as non-current assets.

Trade and other receivables are initially recognised at fair value and subsequently measured at amortised cost using the effective interest method, less any provision for impairment. Refer to Note 1(f) for further discussion on the determination of impairment losses.

o. Trade and Other Payables

Trade and other payables represent the liabilities for goods and services received by the entity that remain unpaid at the end of the reporting period. The balance is recognised as a current liability with the amounts normally paid within 30 days of recognition of the liability.

p. Borrowing Costs

Borrowing costs directly attributable to the acquisition, construction or production of assets that necessarily take a substantial period of time to prepare for their intended use or sale are added to the cost of those assets, until such time as the assets are substantially ready for their intended use or sale.

All other borrowing costs are recognised in profit or loss in the period in which they are incurred.

q. Goods and Services Tax (GST)

Revenues, expenses and assets are recognised net of the amount of GST, except where the amount of GST incurred is not recoverable from the Australian Taxation Office (ATO).

Receivables and payables are stated inclusive of the amount of GST receivable or payable. The net amount of GST recoverable from, or payable to, the ATO is included with other receivables or payables in the statement of financial position.

Cash flows are presented on a gross basis. The GST components of cash flows arising from investing or financing activities which are recoverable from, or payable to, the ATO are presented as operating cash flows included in receipts from customers or payments to suppliers.

r. Comparative Figures

When required by Accounting Standards, comparative figures have been adjusted to conform to changes in presentation for the current financial year.

Where the company retrospectively applies an accounting policy, makes a retrospective restatement of items in the financial statements or reclassifies items in its financial statements, a third statement of financial position as at the beginning of the preceding period in addition to the minimum comparative financial statements is presented.

s. Critical Accounting Estimates and Judgments

The directors evaluate estimates and judgments incorporated into the financial statements based on historical knowledge and best available current information. Estimates assume a reasonable expectation of future events and are based on current trends and economic data, obtained both externally and within the company.

Key estimates

(i) Impairment – general

The company assesses impairment at the end of each reporting period by evaluation of conditions and events specific to the company that may be indicative of impairment triggers. Recoverable amounts of relevant assets are reassessed using value-in-use calculations which incorporate various key assumptions.

No impairment has been recognised in respect of goodwill at the end of the reporting period.

Key judgments

(i) Provision for impairment of receivables

Included in trade receivables at the end of the reporting period are sales receivable from various customers amounting to \$4,737 (2016: \$16,402) that have been outstanding for over 150 days. Some of these customers are experiencing financial difficulties. The directors consider these amounts to be impaired. Accordingly, a provision for impairment has been recognised in respect to these receivables.

NOTE 1: SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

s. Critical Accounting Estimates and Judgments (continued)

(ii) Available-for-sale investments

The company maintains an investment in an unlisted company with a carrying amount at the end of the reporting period of \$51,500 (2016: \$51,500).

No impairment has been recognised in respect of available-for-sale investments at the end of the reporting period.

(iii) Employee benefits

For the purpose of measurement, AASB 119: *Employee Benefits* defines obligations for short-term employee benefits as obligations expected to be settled wholly before 12 months after the end of the annual reporting period in which the employees render the related service. As the company expects that all its employees would use all their annual leave entitlements earned during a reporting period before 12 months after the end of the reporting period, the directors consider that obligations for annual leave entitlements satisfy the definition of short-term employee benefits and, therefore, can be measured at the (undiscounted) amounts expected to be paid to employees when the obligations are settled.

t. New Accounting Standards for Application in Future Periods

Accounting Standards issued by the AASB that are not yet mandatorily applicable to the company, together with an assessment of the potential impact of such pronouncements on the company when adopted in future periods, are discussed below:

 AASB 9: Financial Instruments and associated Amending Standards (applicable to annual reporting periods beginning on or after 1 January 2018).

The Standard will be applicable retrospectively (subject to the provisions on hedge accounting outlined below) and includes revised requirements for the classification and measurement of financial instruments, revised recognition and derecognition requirements for financial instruments and simplified requirements for hedge accounting.

The key changes that may affect the company on initial application include certain simplifications to the classification of financial assets, simplifications to the accounting of embedded derivatives, upfront accounting for expected credit loss, and the irrevocable election to recognise gains and losses on investments in equity instruments that are not held for trading in other comprehensive income. AASB 9 also introduces a new model for hedge accounting that will allow greater flexibility in the ability to hedge risk, particularly with respect to hedges of non-financial items. Should the entity elect to change its hedge policies in line with the new hedge accounting requirements of the Standard, the application of such accounting would be largely prospective.

Although the directors anticipate that the adoption of AASB 9 may have an impact on the company's financial instruments, including hedging activity, it is impracticable at this stage to provide a reasonable estimate of such impact.

 AASB 15: Revenue from Contracts with Customers (applicable to annual reporting periods beginning on or after 1 January 2018, as deferred by AASB 2015-8: Amendments to Australian Accounting Standards
 Effective Date of AASB 15).

When effective, this Standard will replace the current accounting requirements applicable to revenue with a single, principles-based model. Apart from a limited number of exceptions, including leases, the new revenue model in AASB 15 will apply to all contracts with customers as well as non-monetary exchanges between entities in the same line of business to facilitate sales to customers and potential customers.

The core principle of the Standard is that an entity will recognise revenue to depict the transfer of promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for the goods or services. To achieve this objective, AASB 15 provides the following five-step process:

- identify the contract(s) with a customer;
- identify the performance obligations in the contract(s);
- determine the transaction price;
- allocate the transaction price to the performance obligations in the contract(s); and
- recognise revenue when (or as) the performance obligations are satisfied.

NOTE 1: SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

t. New Accounting Standards for Application in Future Periods (continued)

The transitional provisions of this Standard permit an entity to either: restate the contracts that existed in each prior period presented per AASB 108: *Accounting Policies, Changes in Accounting Estimates and Errors* (subject to certain practical expedients in AASB 15); or recognise the cumulative effect of retrospective application to incomplete contracts on the date of initial application. There are also enhanced disclosure requirements regarding revenue.

Although the directors anticipate that the adoption of AASB 15 may have an impact on the company's financial statements, it is impracticable at this stage to provide a reasonable estimate of such impacts.

AASB 16: Leases (applicable to annual reporting periods beginning on or after 1 January 2019).

When effective, this Standard will replace the current accounting requirements applicable to leases in AASB 117: *Leases* and related Interpretations. AASB 16 introduces a single lessee accounting model that eliminates the requirement for leases to be classified as operating or finance leases.

The main changes introduced by the new Standard are as follows:

- recognition of a right-of-use asset and liability for all leases (excluding short-term leases with less than 12 months of tenure and leases relating to low-value assets);
- depreciation of right-of-use assets in line with AASB 116: Property, Plant and Equipment in profit or loss and unwinding of the liability in principal and interest components;
- inclusion of variable lease payments that depend on an index or a rate in the initial measurement of the lease liability using the index or rate at the commencement date;
- application of a practical expedient to permit a lessee to elect not to separate non-lease components and instead account for all components as a lease; and
- inclusion of additional disclosure requirements.

The transitional provisions of AASB 16 allow a lessee to either retrospectively apply the Standard to comparatives in line with AASB 108 or recognise the cumulative effect of retrospective application as an adjustment to opening equity on the date of initial application.

Although the directors anticipate that the adoption of AASB 16 will impact the company's financial statements, it is impracticable at this stage to provide a reasonable estimate of such impact.

NOTES TO THE FINANCIAL STATEMENTS

For the year ended 30 June 2017

NOTE 2: REVENUE AND OTHER INCOME

		Note	2017 \$'000	2016 \$'000
Reve	enue		·	·

Amounts written off against the provision	53
Balance as at the end of the year	(5)

Credit risk

The company does not have any material credit risk exposure to any single receivable or company of receivables.

The following table details the company's trade and other receivables exposed to credit risk (prior to collateral and other credit enhancements) with ageing analysis and impairment provided for thereon.

Amounts are considered as "past due" when the debt has not been settled within the terms and conditions agreed between the company and the customer or counterparty to the transaction. Receivables that are past due are assessed for impairment by ascertaining solvency of the debtors and are provided for where there are specific circumstances indicating that the debt may not be fully repaid to the company.

NOTE 9: TRADE AND OTHER RECEIVABLES (CONTINUED)

The balances of receivables that remain within initial trade terms (as detailed in the table) are considered to be of high credit quality.

	376	344
NON-CURRENT		
Long service leave	24	28
	24	28
Total provisions	400	372

Provision for employee benefits

Provision for employee benefits represents amounts accrued for annual leave and long service leave.

The current portion for this provision includes the total amount accrued for annual leave entitlements and the amounts accrued for long service leave entitlements that have vested due to employees having completed the required period of service. Based on past experience, the company does not expect the full amount of annual leave or long service leave balances classified as current liabilities to be settled within the next 12 months. However, these amounts must be classified as current liabilities since the company does not have an unconditional right to defer the settlement of these amounts in the event employees wish to use their leave entitlement.

The non-current portion for this provision includes amounts accrued for long service leave entitlements that have not yet vested in relation to those employees who have not yet completed the required period of service.

NOTE 19: ISSUED CAPITAL

		2017 \$ '000	2016 \$ '000
7,179	,149 fully paid ordinary shares (2016: 7,179,149)	7,179	7,179
Total	share capital	7,179	7,179
a.	Movements in issued capital		
	Fully paid ordinary shares:		
	At the beginning of the reporting period	7,179	7,179
	Shares issued during the year	<u> </u>	-
	At the end of the reporting period	7,179	7,179

Ordinary shares participate in dividends and the proceeds on winding up of the company in proportion to the number of shares held.

NOTE 19: ISSUED CAPITAL (CONTINUED)

At the shareholders' meetings each ordinary share is entitled to one vote when a poll is called, otherwise each shareholder has one vote on a show of hands.

b. Capital management

Management controls the capital of the company in order to maintain a good debt to equity ratio, provide the shareholders with adequate return and to ensure that the company can fund its operations and continue as a going concern.

The company's debt and capital include ordinary share capital and financial liabilities, supported by financial assets. Currently, the company does not consider it necessary to finance its operations through debt capital. Accordingly, the company's only material financial liabilities at the end of the reporting period are trade and other payables.

There are no externally imposed capital requirements.

Management effectively manages the company's capital by assessing the company's financial risks and adjusting its capital structure in response to changes in these risks and in the market.

There have been no changes in the capital structure or the objectives, policies, processes and strategy adopted by management to manage the capital of the company from the previous year.

The capital structure at 30 June 2017 and 30 June 2016 is as follows:

	Note	2017 \$'000	2016 \$'000
Total borrowings	16	5	29

	- increase/(decrease) in deferred tax liabilities	30	7
	- increase/(decrease) in provisions	28	(4)
	Net cash generated from operating activities	104	797

b. Credit standby arrangement and loan facilities

The company has a bank overdraft/ business multi option facility amounting to \$511,000 (2016: \$511,000). This may be terminated at any time at the option of the bank. At 30 June 2017, \$Nil of this facility was used (2016: \$Nil). Variable interest rates apply to these overdraft/business multi option facility.

NOTE 24: RELATED PARTY TRANSACTIONS

Related Parties

The company's main related parties are as follows:

a. Entities that exercise control over the Company

None.

b. Entities that are subject to common control outside the Company

None.

c. Controlled entities

None.

d. Key management personnel

Any person(s) having authority and responsibility for planning, directing and controlling the activities of the company, directly or indirectly, including any director (whether executive or otherwise) of that company is considered key management personnel.

NOTE 24: RELATED PARTY TRANSACTIONS (CONTINUED)

e. Other related parties of the Company

Other related parties include close family members of key management personnel and entities that are controlled or jointly controlled by those key management personnel, individually or collectively with their close family members.

Transactions and outstanding balances with related parties

Transactions between related parties are on normal commercial terms and conditions no more favourable than those available to other parties (i.e. at arm's length) unless the terms and conditions disclosed below state otherwise. The following transactions occurred with related parties:

None, except for:

— Key management personnel that is disclosed in Note 5: Key Management Personnel Compensation.

NOTE 25: FINANCIAL RISK MANAGEMENT

The company's financial instruments consist mainly of deposits with banks, local money market instruments, short-term investments, accounts receivable and payable, bank loans and overdrafts.

The totals for each category of financial instruments, measured in accordance with AASB 139: *Financial Instruments: Recognition and Measurement* as detailed in the accounting policies, are as follows:

	Note	2017 \$'000	2016 \$'000
Financial assets			
Cash and cash equivalents	8	1,977	2,643
Trade and other receivables	9	2,540	2,087

Total financial assets		4,569	4,782
Financial liabilities			
Trade and other payables	15	1,838	1,683
Borrowings	16	5	29
Total financial liabilities		1,843	1,712

Financial Risk Management Policies

The directors' overall risk management strategy seeks to assist the company in meeting its financial targets, whilst minimising potential adverse effects on financial performance. Risk management policies are approved and reviewed by the Board of Directors on a regular basis. These include the credit risk policies and future cash flow requirements.

Senior executives meet on a regular basis to analyse financial risk exposure in the context of the most recent economic conditions and forecasts.

Specific Financial Risk Exposures and Management

The main risks the company is exposed to through its financial instruments are credit risk, liquidity risk and market risk relating to interest rate risk and other price risk. There have been no substantive changes in the types of risks the company is exposed to, how these risks arise, or the Board's objectives, policies and processes for managing or measuring the risks from the previous period.

NOTE 25: FINANCIAL RISK MANAGEMENT (CONTINUED)

a. Credit risk

Exposure to credit risk relating to financial assets arises from the potential non-performance by counterparties of contract obligations that could lead to a financial loss to the company. The company's objective in managing credit risk is to minimise the credit losses incurred, mainly on trade and other receivables and loans. There is no significant credit risk exposure on available-for-sale financial assets and held-to-maturity investments.

Credit risk is managed through maintaining procedures that ensure, to the extent possible, that clients and counterparties to transactions are of sound credit worthiness and their financial stability is monitored and assessed on a regular basis. Such monitoring is used in assessing receivables for impairment. Credit terms for normal fee income are generally 14 to 30 days from the date of invoice. For fees with longer settlements, terms are specified in the individual client contracts. In the case of loans advanced, the terms are specific to each loan.

Credit risk exposures

The maximum exposure to credit risk by class of recognised financial assets at the end of the reporting period is equivalent to the carrying amount and classification of those financial assets as presented in the statement of financial position.

The company has no significant concentrations of credit risk with any single counterparty or company of counterparties. Details with respect to credit risk of trade and other receivables is provided in Note 9.

Trade and other receivables that are neither past due nor impaired are considered to be of high credit quality. Aggregates of such amounts are detailed at Note 9.

All cash and cash equivalents are held with large reputable financial institutions within Australia and therefore credit risk is considered minimal.

		2017 \$'000	2016 \$'000
Cash	n and cash equivalents:		
-	AA- rated	1,977	-
-	AA rated		2,643
		1,977	2,643

b. Liquidity risk

Liquidity risk arises from the possibility that the company might encounter difficulty in settling its debts or otherwise meeting its obligations related to financial liabilities. The company is not currently exposed to any significant liquidity risk on the basis that the realisable value of financial assets is significantly greater than the financial liabilities due for settlement. The company manages its liquidity risk through the following mechanisms:

- preparing forward-looking cash flow analysis in relation to its operational, investing and financing activities;
- maintaining a reputable credit profile;
- managing credit risk related to financial assets;
- only investing surplus cash with major financial institutions; and
- comparing the maturity profile of financial liabilities with the realisation profile of financial assets.

The table below reflects an undiscounted contractual maturity analysis for non-derivative financial liabilities. Bank overdrafts have been deducted in the analysis as management does not consider that there is any material risk that the bank will terminate such facilities. The bank does however maintain the right to terminate the facilities without notice and therefore the balances of overdrafts outstanding at year-end could become repayable within 12 months. The company does not hold any derivative financial liabilities directly.

Cash flows realised from financial assets reflect management's expectation as to the timing of realisation. Actual timing may therefore differ from that disclosed.

NOTE 25: FINANCIAL RISK MANAGEMENT (CONTINUED)

Net inflow / (outflow)	2,674	3,075	52	(5)	-	-	2,726	3,070

c. Market risk

i Interest rate risk

Exposure to interest rate risk arises on interest-bearing financial assets and financial liabilities recognised at the end of the reporting period whereby a future change in interest rates will affect either the future cash flows (in the case of variable interest instruments) or the fair value financial instruments (in the case of fixed rate instruments).

Interest rate risk is managed using a mix of fixed and floating rate instruments. At 30 June 2017, the company had no interest-bearing financial liabilities and approximately 65% of group interest-bearing financial assets have fixed interest rates. It is the company's policy to keep interest-bearing financial assets with fixed interest rates between 60% and 70%.

The company also manages interest rate risk by ensuring that, whenever possible, payables are paid within any pre-agreed credit terms

The weighted average interest rates of the company's interest-bearing financial assets are as follows:

	2017	2016
	\$'000	\$'000
Financial assets		
Cash and cash equivalents	2.2%	2.5%

ii Other price risk

Other price risk relates to the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market prices largely due to demand and supply factors (other than those arising from interest rate risk) for securities. The company's exposure to other price risk arises mainly from available-for-sale financial assets. Such risk is managed through diversification of investments across industries and geographical locations.

NOTE 25: FINANCIAL RISK MANAGEMENT (CONTINUED)

Sensitivity analysis

The following table illustrates sensitivities to the company's exposures to changes in interest rates and equity prices. The table indicates the impact of how profit and equity values reported at the end of the reporting period would have been affected by changes in the relevant risk variable that management considers to be reasonably possible.

These sensitivities assume that the movement in a particular variable is independent of other variables.

	Profit	Equity
Year ended 30 June 2017	\$'000	\$'000
+/- 2% in interest rates	39	39
+/-10% in available-for-sale investments	5	5
Year ended 30 June 2016		
+/- 2% in interest rates	22	22
+/-10% in available-for-sale investments	5	5

There have been no changes in any of the assumptions used to prepare the above sensitivity analysis from the prior year.

Fair Values

Fair value estimation

The fair values of financial assets and financial liabilities are presented in the following table and can be compared to their carrying amounts as presented in the statement of financial position. Refer to Note 26 for detailed disclosures regarding the fair value measurement of the company's financial assets and financial liabilities.

		2017		2016	
	Note	Carrying Value \$'000	Fair Value \$'000	Carrying Value \$'000	Fair Value \$'000
Financial assets					
Cash and cash equivalents (i)	8	1,977	1,977	2,643	2,643
Trade and other receivables (i)	9	2,540	2,540	2,087	2,087
Available-for-sale investments:	12, 26	52	52	52	52
Total financial assets		4,569	4,569	4,782	4,782
Financial liabilities					
Trade and other payables (i)	15a	1,808	1,808	1,656	1,656
Borrowings (ii)	16, 26	5	5	29	29
Total financial liabilities	_	1,813	1,813	1,685	1,685

- (i) Cash and cash equivalents, trade and other receivables, and trade and other payables are short-term instruments whose carrying amounts approximate their fair values. Trade and other payables exclude amounts relating to the provision of annual leave and deferred revenue, which are outside the scope of AASB 139.
- (ii) Fair values are determined using a discounted cash flow model incorporating current commercial borrowing rates. The fair value of fixed rate bank debt will differ from carrying amounts.

NOTES TO THE FINANCIAL STATEMENTS

For the year ended 30 June 2017

NOTE 26: FAIR VALUE MEASUREMENT

The company measures and recognises only the shares in listed/unlisted companies at fair value on a recurring basis after initial recognition.

The company does not subsequently measure any liabilities at fair value on a recurring basis, or any assets or liabilities at fair value on a non-recurring basis.

a. Fair Value Hierarchy

AASB 13 requires the disclosure of fair value information by level of the fair value hierarchy, which categorises fair value measurements into one of three possible levels based on the lowest level that an input that is significant to the measurement can be categorised into as follows:

Level 1 Level 2 Level 3 Measurements based on inputs Measurements based on Measurements based on quoted prices (unadjusted) in active other than quoted prices included unobservable inputs for the asset or markets for identical assets or in Level 1 that are observable for liability. liabilities that the entity can access the asset or liability, either directly at the measurement date. or indirectly.

The fair values of assets and liabilities that are not traded in an active market are determined using one or more valuation techniques. These valuation techniques maximise, to the extent possible, the use of observable market data. If all significant inputs required to measure fair value are observable, the asset or liability is included in Level 2. If one or more significant inputs are not based on observable market data, the asset or liability is included in Level 3.

Valuation techniques

The company selects a valuation technique that is appropriate in the circumstances and for which sufficient data is available to measure fair value. The availability of sufficient and relevant data primarily depends on the specific characteristics of the asset or liability being measured. The valuation techniques selected by the company are consistent with one or more of the following valuation approaches:

- Market approach uses prices and other relevant information generated by market transactions for identical or similar assets or liabilities.
- Income approach converts estimated future cash flows or income and expenses into a single discounted present value.
- Cost approach reflects the current replacement cost of an asset at its current service capacity.

Each valuation technique requires inputs that reflect the assumptions that buyers and sellers would use when pricing the asset or liability, including assumptions about risks. When selecting a valuation technique, the company gives priority to those techniques that maximise the use of observable inputs and minimise the use of unobservable inputs. Inputs that are developed using market data (such as publicly available information on actual transactions) and reflect the assumptions that buyers and sellers would generally use when pricing the asset or liability are considered observable, whereas inputs for which market data is not available and therefore are developed using the best information available about such assumptions are considered unobservable.

The following tables provide the fair values of the company's assets and liabilities measured and recognised on a recurring basis after initial recognition and their categorisation within the fair value hierarchy:

NOTE 26: FAIR VALUE MEASUREMENT (CONTINUED)

			30 June	e 2017	
	Note	Level 1 \$'000	Level 2 \$'000	Level 3 \$'000	Total \$'000
Recurring fair value measurements		φ 000	φυσ	φ 000	Ψ 000
Financial assets					
Available-for-sale financial assets:					
- shares in unlisted investments	12	-	52	-	52
Total financial assets recognised at fair value		-	52	-	52
Non-financial assets					
Freehold land (i)	13	-	5,034	-	5,034
Freehold buildings (i)	13		1,766	-	1,766
Total non-financial assets recognised at fair value		-	6,800	-	6,800
			30 June	e 2016	
	Note	Level 1 \$'000	Level 2 \$'000	Level 3 \$'000	Total \$'000
Recurring fair value measurements		V 000	4 000	4 000	4 000
Financial assets					
Available-for-sale financial assets:					
- shares in unlisted investments	12	-	52	-	52
Total financial assets recognised at fair value		-	52	-	52
Non-financial assets					
Freehold land (i)	13	-	5,034	-	5,034
Freehold buildings (i)	13		1,766	-	1,766
Total non-financial assets recognised at fair value		_	6,800	_	6,800

b. Valuation Techniques and Inputs Used to Measure Level 2 Fair Values

Fair Value at 30 June 2017	Valuation Technique(s)	Inputs Used
\$'000		
52	Market approach based on net asset backing	Fair value of underlying instruments
52	-	
	30 June 2017 \$'000 52	30 June 2017 Valuation Technique(s) \$'000 52 Market approach based on net asset backing

NOTE 26: FAIR VALUE MEASUREMENT (CONTINUED)

Description		Fair Value at 30 June 2017	Valuation Technique(s)	Inputs Used
		\$'000		
Non-financial a	assets			
Freehold land	(i)	5,034	Market approach using recent observable market data for similar properties; income approach using discounted cash flow methodology	Price per hectare; market borrowing rate
Freehold buildi	ings (i)	1,766	Market approach using recent observable market data for similar properties; income approach using discounted cash flow methodology	Price per square metre; market borrowing rate
		6,800		

(i) The fair value of freehold land and buildings is determined at least every three years based on valuations by an independent valuer. At the end of each intervening period, the directors review the independent valuation and, when appropriate, update the fair value measurement to reflect current market conditions using a range of valuation techniques, including recent observable market data and discounted cash flow methodologies.

There were no changes during the period in the valuation techniques used by the company to determine Level 2 fair values.

c. Disclosed Fair Value Measurements

The following assets are not measured at fair value in the statement of financial position, but their fair values are disclosed in the notes:

Borrowings

The following table provides the level of the fair value hierarchy within which the disclosed fair value measurements are categorised in their entirety and a description of the valuation technique(s) and inputs used:

Fair Value						
Description	Note	Hierarchy Level	Valuation Technique(s)	Inputs Used		
Borrowings	16	5	Income approach using discounted cash	Current commercial borrowing rates for		
			flow methodology	similar instruments		

There has been no change in the valuation technique(s) used to calculate the fair values disclosed in the financial statements.

NOTE 27: COMPANY DETAILS

The registered office of the company is: MBL Trading Limited

Western Australia 6155

The principal place of business is:

MBL Trading Limited

3 - 5 Vulcan Road Canning Vale

Western Australia 6155

NOTES TO THE FINANCIAL STATEMENTS

For the year ended 30 June 2017

NOTE 28: COMPARATIVE FIGURES

The following comparative figures have been restated as a result of errors in revaluation surplus in the prior periods. These were detected during the 2017 financial year.

	Note	As restated 2016 \$'000	As previously stated 2016 \$'000
Statement of Changes in Equity			
Reserves	а	5,991	5,991
Adjustment for error in revaluation reserve in respect of properties sold in 2006 financial year	b	(4,173)	-
Deferred tax entries due to correction of the prior period error in the			
revaluation reserve	С	154	-
	_	1,972	5,991
Retained earnings		(2)	(2)
Adjustment for error in revaluation reserve in respect of property sold in 2006	b	4,173	_
	b	4,173	_
Deferred tax entries due to correction of the prior period error in the revaluation reserve	С	(405)	-
		3,766	(2)

- a. Included in reserves is a general reserve of \$1,005,475, which records funds, set aside for future expansion of the company. However, this general reserve was corrected in 2015 financial year to be included in the revaluation surplus account.
- b. In September 2005, MBL Trading Limited settled the sale of its 1.2ha property (vacant lot) on the corner of Abernethy and Kewdale roads for \$2,550,000. On 1 October 2005, MBL Trading Limited also sold its principal trading property in Victoria Park for \$4,500,000. The revaluation surplus amounted to \$4,173,582 in relation to the two properties had not been reversed in the financial statements for the year ended 30 June 2006.
- c. Deferred tax entries as a result of the aforementioned prior period entry in the revaluation reserve.

DIRECTORS' DECLARATION

In accordance with a resolution of the directors of MBL Trading Limited, the directors declare that:

- 1. the financial statements and notes, as set out on pages 9 to 42 are in accordance with the *Corporations Act 2001* and:
 - a. comply with Australian Accounting Standards, which, as stated in accounting policy Note 1 to the financial statements, constitutes compliance with International Financial Reporting Standards (IFRS); and
 - b. give a true and fair view of the financial position as at 30 June 2017 and of the performance for the year ended on that date of the company.
- 2. in the directors' opinion there are reasonable grounds to believe that the company will be able to pay its debts as and when they become due and payable.

INDEPENDENT AUDITORS' REPORT TO THE MEMBERS OF MBL TRADING LIMITED TRADING AS MBL FOOD SERVICES ACN 111 463 864

Opinion

We have audited the financial report of MBL Trading Ltd ("the company"), which comprises the statement of financial position as at 30 June 2017, the statement of comprehensive income, statement of changes in equity and statement of cash flows for the year then ended, and notes to the financial statements, including a summary of significant accounting policies, and the directors' declaration.

In our opinion:

- a. the accompanying financial report of MBL Trading Ltd is in accordance with the Corporations Act 2001, including:
 - (i) giving a true and fair view of the company's financial position as at 30 June 2017 and of its financial performance for the year then ended; and
 - (ii) complying with Australian Accounting Standards and the Corporations Regulations 2001; and
- b. the financial report also complies with International Financial Reporting Standards as disclosed in Note 1.

Basis for Opinion

We conducted our audit in accordance with Australian Auditing Standards. Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Report section of our report. We are independent of the company in accordance with the auditor independence requirements of the Corporations Act 2001 and the ethical requirements of the Accounting Professional and Ethical Standards Board's APES 110: Code of Ethics for Professional Accountants (the Code) that are relevant to our audit of the financial report in Australia. We have also fulfilled our other ethical responsibilities in accordance with the Code.

We confirm that the independence declaration required by the *Corporations Act 2001*, which has been given to the directors of the company, would be in the same terms if given to the directors as at the time of this auditor's report. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Information Other than the Financial Report and Auditor's Report Thereon

The directors are responsible for the other information. The other information comprises the information included in the company's annual report for the year ended 30 June 2017, but does not include the financial report and our auditor's report thereon. Our opinion on the financial report does not cover the other information and accordingly we do not express any form of assurance conclusion thereon. In connection with our audit of the financial report, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial report or our knowledge obtained in the audit or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Responsibilities of Directors for the Financial Report

The directors of the company are responsible for the preparation of the financial report that gives a true and fair view in accordance with Australian Accounting Standards and the *Corporations Act 2001* and for such internal control as the directors determine is necessary to enable the preparation of the financial report that gives a true and fair view and is free from material misstatement, whether due to fraud or error.

In preparing the financial report, the directors are responsible for assessing the ability of the company to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the directors either intend to liquidate the company or to cease operations, or have no realistic alternative but to do so.

Auditor's Responsibilities for the Audit of the Financial Report

Our objectives are to obtain reasonable assurance about whether the financial report as a whole is free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with the Australian Auditing Standards will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of this financial report.

As part of an audit in accordance with the Australian Auditing Standards, we exercise professional judgement and maintain professional scepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial report, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the company's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the directors.
- Conclude on the appropriateness of the directors' use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial report or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial report, including the disclosures, and whether the financial report represents the underlying transactions and events in a manner that achieves fair presentation.
- Obtain sufficient appropriate audit evidence regarding the financial information of the entities or business
 activities within the company to express an opinion on the financial report. We are responsible for the direction,
 supervision and performance of the company audit. We remain solely responsible for our audit opinion.

We communicate with the directors regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.
